

EVOLVE DATA ANALYTICS

EVOLVE-Store™

Your Store in Your Hands

EVOLVE-Store

Your Store in Your Hands

Q
A

Online sales are increasing, which makes increasing my store conversion rates a top priority. How can I maximize the potential from my EAS systems, while keeping my store associates focused on spending valuable time with shoppers?

EAS works, there is no doubt about it, but in order for it to provide retailers like you with the very best return on their investment, it must integrate easily with retail operations.

EVOLVE-Store is the latest innovation from Checkpoint Systems, involving a real-time app. The app delivers real-time information through a smartphone or tablet, providing real-time visibility and engagement with your EAS & ORC theft prevention systems.

The EVOLVE-Store app will help to improve your consumer conversion rates through real-time visibility of the number of shoppers in your store and measures your policy compliance by managing response times to alarm events.

By monitoring, measuring and managing an EAS program, you can deter opportunistic thieves and ORC activity, reduce shrink and increase on-shelf availability, sales and profits. This in turn, improves your staff confidence and engagement with their EAS program ensuring a significant return on investment.

- ✓ **REAL TIME APP**
enabling real-time visibility and engagement
- ✓ **COMBINED FUNCTIONALITY**
of several reporting solutions
- ✓ **VISIBILITY OF THEFT-RELATED**
events affecting the store
